

Cigarette Lighter Adapter Model LA-7021

General Description

Model LA-7021 is a DC to DC converter designed to power any NAL Research satellite modems and tracking modems series A3LA by plugging into a vehicle cigarette lighter. It can provide power directly to the modem or indirectly to the modem via the audio breakout box (model SYN-AD-LBT). Two different versions are offered. The standard adapter has a 9-pin serial cable. And, as an option, a USB interface cable can also be provided.

Specifications

Input: 9-12VDC, 3.0A (minimum)
Output: 4.4VDC, 3.0A
Connectors: DB-25 Multi-interface
DB-9 serial
USB (optional)
